<b>Title</b>	<b>Lead Electrical Engineer</b>
<b>Reports to</b>	<b>Electrical and Controls Engineering Manager</b>

---

**Company and Position Description**

---

Array Technologies, Inc. (ATI) is the global leader in solar tracking and experiencing explosive growth built on our best-in-class technology and dynamic team. ATI is seeking highly skilled, self-motivated people who want to accelerate the world's adoption of clean and economical energy. If you meet these criteria please consider the company that has been leading the solar energy revolution for 27 years.

We seek professionals with electrical and mechanical engineering experience to join our growing team. The Lead Electrical Engineer will be the primary engineer responsible for the electrical design, support and refinement of our solar tracker robots and diagnostic products. The successful candidate will be able to identify functional problems and suggests resolutions. They will assist in the definition of internal quality control standards and the maintenance of reliability programs. They will analyze test cases and provide regular progress reports. This position is full-time and exempt. Pay is dependent on experience.
